

Store it all in **one place.**

Managed Terminal Services

Ganuch Managed Terminal Services utilizes a centralized server to host your applications (Financial, Operations, Email, Office, etc.) In addition to storing all of the software and data on the server, all management tasks (maintenance, updates, and upgrades) are performed by our Microsoft Certified engineers. New remote locations can be deployed with ease, while maintaining a single point of entry to sensitive information. With a Managed Terminal Services solution we become your IT Department, allowing you to concentrate on growing your business.

What it does:

- **Host all of your applications** (Financial, Operations, E-mail, Office, etc.)
- **Remote access to applications & printing** (Anywhere, Anytime access)
- **Works with any computer** (Windows, Mac OS and Linux)
- **Government certified facility** (Certified by US Department of Defense)
- **Multi-Layered Back-up service** (Onsite, Offsite, and Continuous Protection)
- **128 bit encryption and low bandwidth usage** (Can also run on dial-up and cellular)
- **Real-Time** (Faster than PC Anywhere or VPN)
- **HIPPA, Sarbanes-Oxley and Gramm-Leach-Bliley Compliant** (Any regulatory Compliance)

What this means to you

Lower cost of user computers • Lower cost of additional back-up hardware • Lower bandwidth usage & cost
Lower electrical consumption • Lower maintenance cost • Lower cost of unneeded duplicate software
Increased uptime resulting in increased employee productivity
